Score	55.33%	75%

## INTERNSHIPS

### A2Z info tech | March 2023 - January 2024

- During my internship, I collaborated with the team on various projects, conducted research, analyzed data, and assisted with tasks such as presentations and documentation.

## PROJECTS

### Online food ordering | January 2024 - February 2024

- A food ordering website allows users to browse menus, select dishes, customize orders, and place them for delivery or pickup from various restaurants. It typically includes features like user registration, restaurant listings, menu browsing, online payment options, order tracking, and customer reviews. The website aims to provide a convenient platform for users to explore different cuisines, order food easily, and enjoy timely delivery or pickup services.

### Hospital management system | September 2023 - November 2023

- The Hospital Management System project is designed to streamline the administrative, operational, and clinical tasks within a hospital or healthcare facility. It typically includes modules for patient registration, appointment scheduling, electronic medical records (EMR), billing and invoicing, pharmacy management, laboratory management, inventory management, and reporting.

## ACHIEVEMENTS

- All rounder in BCA  
- Top 10 in class, Nothing in school
